

Remain compliant and in control of your RHI obligations with our dedicated services, delivered by an expert team of consultants and engineers.

Ready to Pass pre-audit assessment service

Our pre-audit offers a RHI compliance check against Ofgem's scheme requirements. We help you prepare so you have everything you need to pass an Ofgem audit, including: Adherence with original applications, documentation, certification, heat meter, fuel records compliance and BSL support.

Heat meter recalibration and replacements

We provide recalibration checks and can advise on necessary replacements to remain compliant. Our engineers are highly adept at providing heat meter replacements, ensuring they are fitted correctly first time and there is no hold up. We also install heat meters that are compliant with Ofgem's rules.

RHI support and Ofgem engagement

We support clients with meter readings, full compliance reporting, RHI amendments, submissions, and Ofgem engagement. We can also advise on your long-term low carbon heat strategy to ensure you have a system that remains efficient, cost effective and compliant.

Additional RHI services provided by Reheat

Boiler Replacements

If you need to replace your RHI-accredited biomass boiler and wish to retain the existing tariff, you must submit a new RHI accreditation application following decommissioning. We manage the full process ensuring ongoing accreditation, compliance, and continued tariff support for the system.

Second Hand Boiler Sales

If you no longer need your RHI accredited biomass boiler due to changes in site use, heating demand, or business operations it may still hold value. RHI accredited boilers retain their tariff, meaning there's a strong second-hand market for compliant systems.

Rather than leaving it unused we can help you unlock its full potential by facilitating a compliant resale and ownership transfer to a new site. We manage the end-to-end process of selling, relocating, acquiring, and installing RHI accredited biomass boilers.

We have helped clients access millions of pounds worth of frozen RHI payments

Our engineers have undertaken hundreds of heat meter replacements across the UK

Our RHI experts have helped clients to unlock millions of pounds in historic payments

Benefit from a team experienced in dealing with Ofgem, so you don't have to

Don't let your Ofgem audit land you in hot water
